

A Three-Dimensional Disposition Structure of An Electric Board Component

Abstract

5 The three-dimensional disposition structure of an electric board component, comprising an electric board and several elements. The several elements includes several plane elements, which have at least one short connection leg, and several elevated elements, which have at least one long connection leg. Wherein, the plane element is welded onto the electric board and its bottom is close to the electric board, and the elevated
10 element is welded onto the electric board and its bottom is above the plane element.
